Cover Letter

TO
Hiring Manager

FROM
Mohamad Al Maleh
Senior Frontend Developer

Dear Hiring Manager,

This letter is to express my interest in the recently posted job for an experienced, detailed-oriented, Frontend Web Developer.

As you'll see, I have more than 7 years of hands-on experience efficiently coding websites and web applications, using modern web technologies like React in addition to AngularJS and JQuery.

My solid knowledge in Javascript / HTML / CSS, fluently speaking English, and my experience in successfully implementing high-tech modern web applications makes me confident that I will be a great addition to your organization, and give you exactly what you are looking for in this position.

When I saw that your company is offering a position that suites my skills and requiring modern technologies, I got motivated to apply, and I'm ready to commit to the hiring process to show my skills to convince you that I am the right candidate for this amazing job opportunity.

I can be reached anytime via my cell phone, +90 507 099 0448 or by email at mohammad.maleh@gmail.com.

Best regards,
Mohamad Al Maleh

Senior Frontend Developer

Global Kapital Tech - Istanbul, Turkey

FEB 2018 - NOV 2020

worked with a team of 3 frontend developers mainly on a banking web application.

we used **React/Redux, Scrum, Git, CI and Scrum** to develop our projects.

My main responsibilities are to develop and maintain one of three projects, and to communicate directly with the design and testing team.

after 6 months I got chosen to be outsourced to **lead the frontend development** of a newly formed team of 4 members which has a startup vibe.

Specialized in **Crypto Currency** related projects and other smaller projects.

We use **React/Redux, English, Git**, we don't use CI and Scrum.

My main responsibilities to make decisions in developing and designing multiple web applications and commercial websites in addition to a mobile application I developed using React-native.

also, I communicate directly with the projects owner to understand his ideas and vision, to implement it into real-world applications.

Technologies: React, Redux, React Native, Jest, Sass, Styled Components, Scrum, CI, Git

Projects: - **Interaudi** (React/Redux): online banking web app

- **myKredit.com** (React/Redux): online bank-independent loans SPA.

- **Kambo.io** (React/ Redux): crypto currency based loans SPA.

- **Kambo.exchange.io** (React/ Redux, Design): crypto currency based exchange SPA.

- **Family Tracker** (React Native, Design): Whatsapp tracking mobile application for android with 1M+ downloads so far.

- **Warehouse System** (React/Redux, Design): small CRM system to manage a warehouse business.

- **Multiple Admin Dashboards**(React/Redux, Design): SPA's to track our mobile applications activities, mostly Charts and Reports.

- **Papilla, Global Energy, Trakya** (HTML, Scss, Design): A corporate based websites.

- in addition to over 6 small commercial websites.

Frontend Developer

Global Kapital FX - Istanbul, Tukey

JUL 2015 - AUG 2017

Worked with a high tech international team of two frontend developers (my team was awarded as the best team in the company).

Mainly maintaining a Forex contracts life cycle management system (CLM)

My responsibilities were to develop and maintain one of the companies most successful projects, including code refactoring, code review, enabling unit testing and E2E testing, contributing to UI design, and suggesting new features ideas to improve the project.

Technologies: AngularJS, Sass, Webpack, Mocha, Automated Tests, CI, Git, Scrum

Project:

- **Partnersportal.gkfx.com** (AngularJS): a forex related contract life cycle managment system.
